PROFESSIONAL EXPERIENCE

The Software Guild, Louisville, Ky – June 2019
– Present

C#/.Net Apprentice

- Programmed an application that creates, reads, updates, and deletes orders from a file. The orders were designed to mimic the basic needs of a flooring company. This application uses interfaces to do dependency injection depending on a selected mode. The application also utilizes multiple layers to ensure there is a clear separation of concerns while keeping the separate parts of the application highly cohesive.
- Given a partially completed system that tracks students and courses for a university. Finished the system using **ASP.NET MVC**, designed views using the Bootstrap framework for CSS.
- Implemented a Hat Manager program with C# that runs in the console. The Hat Manager program demonstrate basic syntax involving console input and output, variables, flow of control statements, and expressions.
- Experienced with **RESTful** web services using **Web API**, .NET web services using **SOAP** and **JSON**
- Created a Rock – Paper- Scissor game with C# using static methods and various flow of control statements.

Louisville Doors & Closet, Louisville, Ky – August 2019 – Present

Service Worker

- Operating tools and reading layouts/ wireframes to install doors and closet.
- Ensured accuracy of customer orders and materials.

DSI, Louisville, Ky – April 2018 – August 2019

Forklift Operator/ Driver

- Operated a forklift to manage wood orders for customers, including bundling and loading the product for the customer.

EDUCATION

Code Louisville, Louisville, Ky - *Oct 2016 – Jan 2017*

Front End Web Development

- Created a website with HTML5, CSS, and JavaScript to help showcase an Interior Design portfolio.
